

SELECTAIR® MAX

Low Air Loss Mattress Replacement

User-Friendly Control Unit

Rapid inflation, easy set-up and a motor so quiet, the patient will hardly know it's there!

The SelectAir® System

Quietly circulates air through individual cells and allows air to escape from the mattress.

Wicking Action: Air escapes through tiny holes on the top of the mattress and circulates under a vapor-permeable cover to wick moisture away from patient.

SELECTAIR® MAX Features

Pulsation (alternating pressure): Provides three cycle settings that continually readjust the system to ensure patient comfort.

System Lock: Helps to prevent accidental adjustments and automatically resets the system in case of a power failure.

Auto Comfort: Takes the guess work out of programming. During set-up, mattress sets optimal pressure according to patient's weight distribution.

Zoned, "true" low air loss used in acute care hospitals nationwide

Weight Limit: 500 lbs. (227 kg)

Mattress Size: Fits most standard bed frames. Custom sizes available. Inquire for details.

Cover: Water resistant, vapor-permeable, flame resistant and biocompatible

Warranty: One Year Limited Warranty on control unit and soft goods

Medicare Code: E0277 Group 2 Support Surface
