

SELECTAIR[®] MAX

SELECT SERIES

Keeps Patient Cool and Dry

"True" Low Air Loss technology allows air to escape from the top of the mattress and directly interact with moisture at the patient/bed boundary.

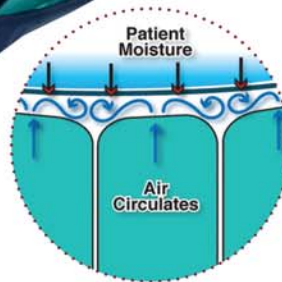

User-Friendly Control Unit

Rapid inflation, easy set-up, and a motor so quiet, the patient will hardly know it's there!

Wicking Action

Air escapes through tiny holes on the top of the mattress, and circulates under a vapor-permeable cover, to wick moisture away from patient.

All the benefits of the Select Air Standard plus:

Auto Comfort - During set up, the system sets optimal pressure according to client's weight distribution.

Pulsation - provides three levels of therapeutic alternative pressure relief.

System lock - prevents accidental adjustments.

Medicare Code

E0277
Group 2 Support Surface

Mattress Sizes Available

Fits most standard bed frames. Custom sizes available.
