

SELECTAIR® STD

SELECT SERIES

Keeps Patient Cool and Dry

"True" Low Air Loss technology allows air to escape from the top of the mattress and directly interact with moisture at the patient/bed boundary.

Wicking Action

Air escapes through tiny holes on the top of the mattress, and circulates under a vapor-permeable cover, to wick moisture away from patient.

User-Friendly Control Unit

Rapid inflation, easy set-up, and a motor so quiet, the patient will hardly know it's there!

Firm Mattress Mode helps facilitate nursing care during dressing changes and repositioning of the individual.

Upright Mode gives added support when the head of the bed is elevated.

Foot Pillow prevents unnecessary skin breakdown due to client migration.

Medicare Code

E0277
Group 2 Support Surface

Mattress Sizes Available

Fits most standard bed frames. Custom sizes available.

Cover (Top Surface)

Waterproof, vapor permeable, flame resistant, and biocompatible cover.
